

Parents! Do you know...

Cigarettes and Spit Tobacco aren't the only harmful and addictive tobacco products available!

There are new **SMOKELESS** and **SPIT-LESS** tobacco products that can be just as harmful and addictive as the current tobacco products on the market today.

The smokeless products which resemble mints and candy will be easy for kids to conceal and use at school, a sporting event or at home. The tobacco companies are targeting kids with flavored products that are appealing and addictive.

Product details are reported to be:

Product name	Looks similar to	Dissolves in about	Flavors	Mg of nicotine
Camel Orbs	a mint	10 - 15 minutes	fresh and mellow	1.0 mg
Camel Sticks	a toothpick	20 - 25 minutes	mellow	3.1 mg
Camel Strips	a melt-away breath freshener	2 - 3 minutes	fresh	0.6 mg

These new dissolvable tobacco products are not safe, they can cause nicotine poisoning if taken by children!

So it is critical that you inform your kids that dissolvable nicotine products are dangerous, contain nicotine and are as addictive as other tobacco products, such as cigarettes.
